

Physical and Technical Specification of C1-T

Detailed Properties:

This kit contains more than 425 components and 60 kinds of them. The major components and parts are 4 dots structures, 3 linear structures, 6 hexahedral structures, 9 gears, 2 bearings and 4 axles etc. With this kit, students can realize 29 teaching activities, such as quadrilateral, trestle ladder, inclined tower, bridge, lever ruler, balance scale, mechanical claw, basketball stand, inclined planepulling, the sloth, graining machine, the eye – rolling pet, hand-driven fan, baseball boy, manual mixer, hand-driven carrousel, mini hand-driven drill, hand-driven barrier gate, spin top launcher, manual lifting table, gravitational car, gravitational dodgem car, gravitational wheel-axle car, elastic ball shooter, elastic wheel-axle car, balloon-driven car, hand-driven show box, magnetic seesaw and giant stride. The guidance of construction will be listed in the user's manual. No screws needed in the construction.
